Abstract - Dean

Crossing the divide: The psychology of animal ethics

This talk will explore the moral psychology of how people come to think about animal ethics, with a focus on people who don't think it is important. It can be difficult to understand and engage with people who hold different ethical views to our own, so this talk will focus on helping you understand multiple perspectives and find ways to bridge the gap and persuade others that animal ethics is important.

Dr Tim Dean
Senior Philosopher and Manos Chair in Ethics
The Ethics Centre
